Immediate Joiner | 1.3+ Years of Production Experience

Professional Summary

AI/ML-focused **React Native Developer** and Full Stack Developer with **1.3+ years of production experience** building and deploying scalable mobile and web applications. Currently building **Cyepro**, a large-scale **B2B Dealer Management System** mobile app for the automobile industry, live on both the **Google Play Store and Apple App Store**, using **React Native and Expo**. Experienced in LLM-powered applications, autonomous AI agents, NLP solutions, semantic job matching, ATS resume analysis, and AI-driven automation using Groq LLaMA 3.3, Gemini API, and Python-based NLP workflows. Built and deployed SmartHire, an autonomous AI job-matching platform that discovers jobs, evaluates them against resumes using LLM-based semantic analysis, and delivers personalised recommendations automatically. Strong full-stack background enables end-to-end development of AI-powered and mobile-first products, from AI integration and backend services to React Native development and production deployment. **Available to join immediately.**

AI / ML Skills

- **Generative AI & LLMs:** Groq API, LLaMA 3.3, Gemini API, LLM Application Development, Prompt Engineering, LLM-based Evaluation
- **AI Agents & Automation:** Autonomous AI Agents, Scheduled AI Workflows, node-cron, Automated Job Discovery, AI-based Decision Making
- **NLP & Machine Learning:** Natural Language Processing, BERT, Text Classification, Semantic Job Matching, Resume Analysis, Multi-class Classification
- **AI Data Processing:** PDF Text Extraction, Resume Parsing, Text Processing, Keyword Analysis, Skills Alignment, Matched/Missing Skill Detection
- **AI Applications:** ATS Resume Analysis, AI-generated Recommendations, Semantic Scoring, Job Recommendation Systems, AI-powered Automation

Technical Skills

- **Programming Languages:** Python, JavaScript (ES6+), TypeScript, Java, C++
- **Mobile Development:** React Native, Expo (Managed Workflow, EAS Build, EAS Submit, EAS Update, Dev Client, Config Plugins), Android & iOS, Play Store & App Store Deployment
- **Frontend Development:** React.js, Next.js, Tailwind CSS, Redux, HTML5, CSS3
- **Backend Development:** Node.js, Express.js, NestJS, Java Spring Boot, RESTful APIs, WebSockets (Socket.io), Redis, JWT Authentication
- **Databases:** MongoDB, MySQL, PostgreSQL, SQLite
- **Firebase & Cloud Platforms:** Firebase Authentication, Firebase Crashlytics, Firebase Cloud Messaging (FCM), AWS, Vercel, Render, Cloudinary, Railway, Docker
- **APIs & Third-Party Integrations:** JSearch API, Google Maps API, Location Services, Brevo, Razorpay, FAST2SMS, VdoCipher, Nodemailer
- **Testing & Development Tools:** Git, GitHub, Postman, Maestro, Detox, Appium, REST API Testing, Functional Testing, Code Review
- **Computer Science Fundamentals:** Data Structures & Algorithms, Object-Oriented Programming, Arrays, Strings, Trees, Graphs, Dynamic Programming, Sliding Window

Professional Experience

React Native Developer (Full Stack Developer) *07/2026 – Present*

Cyepro, Gachibowli, Hyderabad, Telangana, India

- Developing and maintaining **Cyepro**, a large-scale **B2B Dealer Management System** mobile application for **automobile companies**, live on both the **Google Play Store and Apple App Store**, enabling dealers and customers to browse, evaluate, and purchase vehicles end-to-end.
- Built and maintain **40+ feature modules** spanning authentication, dealership operations, and customer-facing workflows using **React Native** and **Expo SDK 52** (managed workflow, expo-dev-client, EAS Build across 5 build profiles).
- Implemented **Firebase Authentication**, **Firebase Crashlytics** for crash monitoring, and **Firebase Cloud Messaging (FCM)** for real-time push notifications.
- Integrated location-based features using **react-native-maps** and **expo-location**, including background location tracking for real-time field/vehicle tracking use cases.
- Implemented media handling with **expo-image-picker, expo-media-library, expo-av**, local data persistence via **expo-sqlite**, and **OTA (Over-the-Air) updates** using expo-updates for seamless production releases without app store resubmission.
- Configured custom **deep linking** schemes for seamless in-app navigation and third-party integration flows.

- Driving an initiative to introduce **end-to-end mobile automation testing (Maestro, Detox, Appium)** into a production codebase with zero prior automated coverage, aimed at improving release reliability.
- Strong hands-on expertise across the **full Expo ecosystem** – managed workflow, EAS Build/Submit/Update, dev clients, and config plugins.

Full Stack Developer & Team Lead *05/2025 – 05/2026*
Technoji Global Private Limited, Visakhapatnam, Andhra Pradesh, India

- Led a cross-functional team delivering **6 live production applications** using MERN stack and React Native, defining scope, assigning tasks, tracking milestones, and ensuring timely releases.
- Worked directly with clients to gather requirements, prioritise features, manage scope changes, and drive iterative product delivery.
- Designed RESTful APIs, database schemas, scalable backend services, and real-time features using **WebSockets (Socket.io) and Redis**.
- Integrated AI and intelligent automation capabilities using **LLM APIs, language processing workflows, and third-party AI services**.
- Managed end-to-end development from requirements and implementation through Android APK, iOS IPA, and production deployment.
- Conducted code reviews, maintained development standards, and supported junior developers across active projects.

Production Deliverables

- **Cyepro** – B2B Dealer Management System app for automobile companies (React Native, Expo, Firebase, WebSockets) | Live on Play Store & App Store – End-to-end vehicle purchase workflow, 40+ modules, real-time push notifications, and OTA updates.
- **Kroodl** – Location-based social networking app (React Native, Node.js, Redis, WebSockets, Google Maps) | Live on Play Store & App Store – Real-time chat, proximity-based user discovery, and Redis caching.
- **Dentoji** – Dental clinic management platform (React.js, Node.js, MongoDB, AWS) | Live – Patient management, role-based workflows, dashboard metrics, and cloud deployment.
- **Errand Learn Hub** – Online learning platform (React.js, React Native, Node.js, VdoCipher, AWS) | Live Web + Android + iOS – DRM-protected video delivery and unified web/mobile experience.
- **LandsTime** – Property listing application (React Native, Node.js, Firebase, Google Maps) | Live on Android & iOS – Multi-language support, OTP authentication, location-based property search, and voice integration.
- **B-Tea & Zunozyra** – E-commerce platforms (React.js, Node.js, MongoDB) | Client Projects – Cart, order management, authentication, and production deployment.

AI & Agent Projects

SmartHire – AI-Powered Job Hunting Platform *Live | Live App | GitHub*
Tech Stack: React.js, Node.js, Express.js, MongoDB, Python, Groq LLaMA 3.3, Gemini API, JSearch API, Brevo, Cloudinary, Vercel, Render

- Built and deployed an **autonomous AI job-matching agent** that runs every morning at 8 AM, discovers live jobs through JSearch API, evaluates jobs against the user's resume using **Groq LLaMA 3.3**, and automatically delivers the top 5 matches by email.
- Implemented an **LLM-based semantic job matching system** that evaluates complete job descriptions against resume content, identifying matched skills, missing skills, and generating Apply / Consider / Skip recommendations.
- Developed an **AI-powered ATS Resume Analyzer** that extracts text from uploaded PDF resumes and evaluates keywords, readability, formatting, skills alignment, and generates AI-based improvement recommendations.
- Designed automated AI workflows using **scheduled execution and autonomous decision-making**, enabling continuous job discovery and personalised recommendations without manual interaction.
- Built resume processing workflows involving **PDF parsing, text extraction, content analysis, skill identification, and AI-based scoring**.
- Developed authentication and application tracking with OTP email verification, JWT sessions, Cloudinary resume storage, and Saved / Applied / Interview / Offer / Rejected pipeline management.

NLP / Machine Learning Project

YouTube Video Rating – BERT-Based Sentiment Analysis *NLP | Python*

- Developed an NLP system using **BERT-based models** to classify YouTube comments into multiple sentiment categories.
- Implemented multi-class text classification to analyse audience sentiment and generate an overall video rating based on comment sentiment.

Other Project

Doctor Appointment Booking System *MERN Stack | Vercel + Render*

- Developed a role-based healthcare booking platform with Admin, Doctor, and Patient workflows, JWT authentication, real-time appointment slot booking, and responsive Tailwind CSS UI.

Education

B.Tech – Computer Science and Engineering *2021 – 2025*
Rajiv Gandhi University of Knowledge Technologies, Srikakulam, Andhra Pradesh, India CGPA: 8.8

Competitive Programming

LeetCode (C++) – 250+ Problems Solved | Arrays, Strings, Trees, Graphs, Dynamic Programming, Sliding Window
